

server/model/characters  
/humanoids/server\_Magnetman.h

```
graph BT; A["server/model/characters  
/humanoids/server_Magnetman.h"] --> B["server/model/characters  
/humanoids/server_Magnetman.cpp"]; A --> C["server/parsers/server  
_JsonMapParser.cpp"];
```

The diagram illustrates a header file inclusion relationship. At the top is a gray box representing the header file: `server/model/characters/humanoids/server_Magnetman.h`. Below it are two white boxes representing source files. A blue arrow points from the left source file, `server/model/characters/humanoids/server_Magnetman.cpp`, to the header file. Another blue arrow points from the right source file, `server/parsers/server_jsonMapParser.cpp`, to the same header file.

server/model/characters  
/humanoids/server\_Magnetman.cpp

server/parsers/server  
\_JsonMapParser.cpp
